

CASE STUDY

Service: Car Park Decking

Project: Waitrose Supermarket Top Deck

Location: Southsea – Hampshire, UK

Installation overview

This top deck car park at Waitrose Supermarket in Southsea, Hampshire was in extremely bad repair. It was not only unsafe but suffered from complete degradation of the tarmac treatment. It was also allowing surface water to penetrate the substrate and was causing damage to the reinforcing bars within the underlying structure - whilst also causing substantial damage to the facilities below.

Special considerations

This picture shows the details of the car park decking system completed to take into considerations the access way out from the top deck.

Why ERS was selected

John Lewis & Partnership approached ERS network to propose a long-term solution to their current car park decking problems.

Within a very short time, ERS was able to investigate and bring an acceptable proposal to the table. ERS subsequently project-managed the entire operation from start to finish and completed the project within time, on budget and also exceeded the client's expectations!

Euro Resin Solutions Ltd. is a highly professional and expert installer of resin flooring solutions, well equipped to meet the demands of real industrial and commercial environments.
